

Therapeutic apheresis in practice:

Plasma exchange for transplantation and therapeutic erythrocytapheresis.

October 23rd – 3 PM CET

In collaboration with:

The European Society for Hemapheresis, in happy to host you for this webinar in collaboration with Terumo Blood and Cell Technologies.

[Register](#)

Join two international experts as they discuss practical approaches in two areas of growing importance:

Plasma treatment in ABO-incompatible transplantation

- How to expand treatment possibilities when compatible donors are scarce.
- Practical approaches to prevent and manage post-transplant complications.
- Evidence-based strategies to improve patient outcomes with plasma exchange.

Red cell depletion with therapeutic erythrocytapheresis (TEA)

- A safe and efficient alternative to phlebotomy
- Clinical benefits for patients with cardiovascular comorbidities or poor tolerance.
- Reduced procedure burden and improved hematocrit control.

Engage with our experts through a live Q&A session. Get your questions answered and gain valuable insights.

Meet the Speakers:

Univ. Prof. Dr. Nina Worel

Medical University of Vienna, Dept. for Transfusion Medicine and Cell Therapy, Vienna, Austria.

Plasma treatment in ABO-incompatible transplantation.

Dr. Ana Kerguelen

Hematologist – MD in Molecular oncology, head of the Therapeutic Apheresis Unit at La Paz University Hospital, Madrid, Spain.

Red Cell Depletion
